EMS TRAINING

First Responder / EMS Group Training

Underwrite a single training day in your community or one that is strategic to your organization, or make an even bigger impact by supporting a series of five sessions. Your partnership helps bring critical education directly to first responders and hospital teams across the region. All sponsorships include on-site signage and acknowledgment throughout the training.

Community Outreach Event

Program support for our SafeTeens and Touch-A-Truck programs begins at $500 and can be tailored to your goals—from providing branded items to event signage.

To explore partnership opportunities in EMS training, please contact our team.

Building safer communities through education and training

Boston MedFlight's Community Training Days bring together local fire, police, and EMS departments for expert-led classroom and hands-on education that strengthens coordination when every second counts.

Support for an education session or series extends our expertise into the community and reinforces the seamless teamwork critical in emergency response.

Sponsorship opportunities are also available for community outreach programs such as SafeTeens and Touch-A-Truck events, which help families and young people connect with our mission and learn how we work alongside their communities.
